

Session Objectives

Session 2

Symptom Management in Different Care Settings

June 28, 2022 at 11:00 am CT

Objectives:

The goal of the session is to:

1. Explore inter-community relationships on the logistics of delivery medications.
2. Learn how to manage complex family dynamics related to symptom management.
3. Discover best practices for managing patients with a history of substance use.
4. Discuss how to discharge patients who no longer qualify for GIP.
